EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Blankinship on Dec. 27, 2005. Enter the following:

1. In claim 1 (line 1), replace the phrase "A compound comprised of general formula" with

--A compound of formula--.

2. In claim 2 (line 1), in claim 3 (line 1) and in claim 4 (line 1), delete the term "general".

3. In claim 7 (line 2) and in claim 8 (line 2), delete the term "optionally".

4. In claim 9 (lines 1-3), replace the phrase "A method of treating a disease selected from the list consisting of type I and type II diabetes mellitus, arthritis, obesity, allograft transplantation and osteoporosis caused by calcitonin" with

-- A method of treating a disease selected from the list consisting of type I and type II diabetes mellitus and obesity--.

Election/Restriction

Applicant's election of Group I in the reply filed on 12/05/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art is Beljean-Leymarie et al. *Canadian Journal of Chemistry* (1983), 61(11), 2563-6. Said reference teaches 1H-Imidazo[4,5-d]pyridazine derivatives substituted by hydrazone (NH-NH₂) at 2-position and by methyl or by phenyl substituents at 5-position (i.e. R¹ = NH-NH₂ and R³ = phenyl or methyl, according to applicant's compound of formula (I)). None of the instant claims read on Beljean-Leymarie et al., since applicant's amino group is substituted by cycloalkyl instead of NH₂ group as disclosed in said prior art. In addition, Beljean-Leymarie et al. is also different from the instant application, since the phenyl in prior art compound is unsubstituted (i.e. R³ = phenyl). Applicants require that the phenyl be substituted by substituents such as C₁₋₃ alkyl, 2-hydroxy-ethyl, carbonylmethyl group, etc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
